Algorithm flowchart example

Ryan Joseph | February 19, 2023

Start → User inputs data

User inputs data → If the user is hungry:

If the user is hungry: —YES→ Suggest some food options

If the user is hungry: —NO→ Ask the user if they want to take a nap

Ask the user if they want to take a nap —NO→ Suggest some other activities to do

Ask the user if they want to take a nap —YES→ Suggest some places to rest
